

Welcome to TeXly

A focused workspace for beautiful documents

June 14, 2026

Abstract

TeXly brings a modern code editor, fast local compilation, useful diagnostics, and a PDF preview into one calm workspace. Edit this file and press **Compile** to see your changes.

1 Write without friction

The editor understands LaTeX commands, keeps your project files close, and builds with the same trusted TeX toolchain used by professional workflows.

- Monaco-powered editing
- One-click `latexmk` compilation
- Automatic bibliography and reference passes
- Build errors linked back to source lines

2 A small example

Euler's identity is often called one of the most beautiful equations:

$$e^{i\pi} + 1 = 0.$$

Shortcut	Action
Cmd/Ctrl + S	Save current file
Cmd/Ctrl + Enter	Compile project
